Auto-Mate

This beautiful ceramic WC, Auto-mate, has a seat which can be warmed up to a comfortable temperature. The use of toilet paper can be done away with as Auto-mate is equipped with an auto-washing mechanism, consisting of a nozzle to splash water on the body, as per the requirement. The drier then blows the body dry without leaving a trace of moisture. Apart from automatic flushing, the soft-closing seat cover employs hydraulic action, so that there is no 'bang' when the seat is put down. As if this isn't enough, Auto-mate flushes and deodorizes automatically after the WC has been used. All the functions of Auto-mate are controlled by a remote control which comes along with this EWC. Other features include night light, a power saving device and a water-saving dual flush which helps conserve water.
