MAINTENANCE TIPS

Tips to increase the life of glass surface and highlight the benefits of treated glass

- **After Each Use:** Rinse or spray the surface with cool, clean water. Wipe it dry or let the water drain off and pat dry the few remaining droplets. You may use a squeegee.

- **Once a Month:** Wet the surface and use nylon body puff to go over the wet surface, rubbing in a circular motion. You should feel places that are "sticky" going back to slick again. Then rinse or spray the surface with cool, clean water just as you do after each use. Wipe it dry or let the water drain off, and pat dry the few remaining droplets.
At Hindware, safety is our top priority. Since glass is one of the key components of our shower enclosures, we make sure we use the highest quality of toughened or tempered glass which comply with Indian and European safety standards. Ensuring that they pass through stringent quality checks. Our aqua clean treatment on the glass repels water, oil and soap making sure that glass stays clean bacteria-free. In addition, we also offer a variety of options such as clear glass, frosted acid wash glass and pattern glass in a myriad patterns. When you opt for a Hindware shower enclosure, you opt for excellence and elegance.
